

A digital tool for safety professionals.

Job Hazard Analytics® is a web-based tool that helps safety professionals create efficient & accurate job hazard analyses.

**JHA includes a Risk Inventory Matrix and other features not found in most other job hazard analysis software.**

#### Intuitive and User-Friendly

Beyond user-friendly, JHA is intuitive to a safety professional. Easily tailor your job steps, hazards and controls to match your job with a drag and drop tool for sequencing job steps.

#### Multi-User Collaboration

Leverage the knowledge of your entire workforce by sharing your JHA content with other authorized users and JHA authors in your Company.

#### Customizable

Quickly tailor and sequence your job steps, hazards and controls to reflect the way the job is actually done at your Company. Once built, your information will be available for subsequent use by any of your Company's authorized users.

#### Hazard-Control Matching

Job Hazard Analytics® provides your Company Administrator(s) with the capability to administratively link a hazard(s) with a job step and control(s) with a hazard. When your JHA authors select the linked job step or hazard, their JHA is populated with the administratively linked content.

#### Nimble Startup

Pre-populated pick lists, including job steps, hazards and controls, provide immediate capability to create JHAs. Capability to import your Company's existing electronic picklist content into Job Hazard Analytics®.

#### Software as a Service (SaaS)

Immediate web-based access delivers responsiveness and access to your Company's library of existing JHAs to minimize the need to start from scratch. Access anywhere, anytime, on any Internet-connected smart device.

#### Dynamic Changes

Changes made to system settings and picklist content by your Company's Administrator(s) are immediately deployed for use by your Company's authorized users.

#### Industry Standards

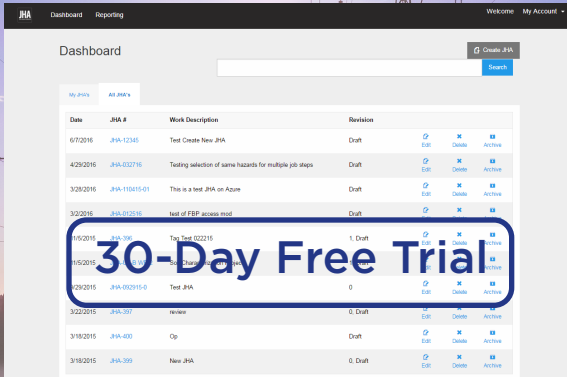

Job Hazard Analytics® provides direct access to industry-recognized content (e.g. NIOSH Pocket Guide) and customizable options to synchronize settings to your Company's Electronic Safety Data Sheets.

#### Authority Controls

Your Company's Administrator(s) control user-access levels within Job Hazard Analytics®. Your Company's JHAs are protected by a firewall from unauthorized access.
